

FAA Safety Team presents:

Lessons from Bush U - Alaskan Bush Flying Techniques in Southern California

Our speaker brings more than 10 years experience in working with pilots in Alaska. Learn what successful bush pilots know and explore techniques for VFR flying that help you to fly safely and precisely. John is an FAA Safety Team Program Manager working in Long Beach, California. He holds an Airline Transport Pilot certificate and flight instructor ratings for single- and multi-engine airplanes, and has accumulated more than 10,000 hours of flight time. He has extensive Alaskan experience in seaplanes and tail wheel aircraft. He is a former FAA Accident Prevention Counselor and Designated Pilot Examiner. John served on the AOPA Air Safety Foundation staff from 1991 to 2002 where, working in video, print, and computer media, he developed seminars and safety education media for pilots. John's presentational skills and aviation experience combine to produce an entertaining and educational seminar experience.

Directions: AFI Main Hangar, next to self-serve fuel island west of the terminal building.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
